

## AGGREGATE IMPACT VALUE (AG-220) BS 812

- Used to determine the aggregate particle resistance to impact.
- Contains the standard Aggregate Impact Value pieces.
- Supplied with automatic blow counter.
- Supplied with a sample cylinder, measuring cylinder and a tamping rod.

Aggregate Impact Value (AG-220)

### TECHNICAL SPECIFICATIONS

- Standard AIV set
- Measure of resistance to impact
- Automatic counter of Blows
- Sample cylinder
- Cylindrical measure
- Tamping Rod

Code	Dimensions (± 1 cm)	Approximate Weight (kg)
AG-220	22 x 44 x 82 (h)	42
