

■ ALUMINUM SAMPLING MACHINE (M-062)

- Used to prepare circular samples from aluminum ingots for XRF analysis
- Fully automatic, with 3 functions:
 - Drilling
 - Polishing
 - Cutting
- Ingot is placed on the support system and all the a/m functions are done automatically in a short time by an operator
- The sample taken has a desired diameter and thickness with smooth surface

● TECHNICAL SPECIFICATIONS

- Fully automatic, with 3 functions:
 - Drilling
