

CEMENT TUBE SAMPLER (C028)

Category: Cement

Product Code: C028

Category: CEMENT

Sub-Category: SAMPLING

-
- The Cement Tube Sampler is specifically designed for obtaining representative samples of hydraulic cement from individual packages, ensuring accurate quality control

assessments.

- Constructed from durable brass, the sampler maintains structural integrity and resists corrosion, providing consistent performance across numerous sampling operations.
 - Its slender, cylindrical design allows for easy penetration into cement bags, facilitating the extraction of samples without significant disturbance to the remaining material.
 - The sampler's dimensions are optimized to collect sufficient quantities of cement for comprehensive testing, aligning with international standards for material sampling.
 - Equipped with a comfortable hardwood handle, the sampler offers ease of use during manual operations, reducing operator fatigue and enhancing efficiency.
-

STANDARDS

ASTM C183 • EN 196-7 • AASHTO T127

TECHNICAL SPECIFICATIONS

- Material: Brass
- Outer Diameter: 32 mm
- Length: 700 mm
- Handle: Hardwood

ORDERING INFORMATION

Item	Code
CEMENT TUBE SAMPLER (Packaged)	C028X00XH
CEMENT SLOTTED TUBE SAMPLER (Bulk)	C029X00XH

Keywords: Cement Tube Sampler, packaged cement sampling, ASTM C183, EN 196-7, AASHTO T127, brass sampler, cement quality control, ALFA Testing Equipment, cement testing tools, hydraulic cement sampling, cement bag sampler
