

# V-FUNNEL TEST SET (B025)

Category: Concrete

**Product Code:** B025

**Category:** CONCRETE

**Sub-Category:** SELF-CONSOLIDATING CONCRETE

- 
- The V-Funnel test is a widely used method for assessing the flowability and viscosity of self-compacting concrete (SCC).

- This test helps determine the time it takes for the SCC to flow through a V-shaped funnel, which is indicative of the concrete's ability to pass through tight spaces and around reinforcement without segregation or blockage.
- 

## **STANDARDS**

EN 12350-9

## **TECHNICAL SPECIFICATIONS**

- Made of stainless steel
- Stand-mounted

## **ORDERING INFORMATION**

Item	Code
V-FUNNEL TEST SET	B025X00XH
