

DENSITY SPOON (G715)

Category: Lab Tools

Product Code: G715

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A density spoon in engineering testing laboratories is used to measure a precise volume of fine materials like powders or aggregates for density and specific gravity tests. It

ensures accurate sampling and consistent test results.

ORDERING INFORMATION

Item	Code
DENSITY SPOON	G715X001H

Keywords: density spoon, G715 density spoon, ALFA Testing Equipment, laboratory density spoon, fine material sampling tool, powder measurement spoon, aggregate sampling spoon, lab tools, engineering lab equipment, specific gravity testing, soil testing accessories
