

# **FILTERING FLASK (W021)**

Category: Lab Tools

**Product Code:** W021

**Category:** LAB TOOLS

**Sub-Category:** GLASSWARE

- 
- A filtering flask in engineering testing laboratories is used to hold liquids during filtration processes. It is typically used with a vacuum pump to create suction, which

speeds up the filtration of liquids through a filter paper, ensuring the separation of solids from liquids in various chemical or material testing procedures.

## **ORDERING INFORMATION**

Item	Code
FILTERING FLASK - 100 ml	W021G100H
FILTERING FLASK - 250 ml	W021G250H
FILTERING FLASK - 500 ml	W021G500H
FILTERING FLASK - 1000 ml	W021G01KH
FILTERING FLASK - 2000 ml	W021G02KH
