

GEOLOGICAL HAMMER (G752)

Category: Lab Tools

Product Code: G752

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A geological hammer in engineering testing laboratories is used for breaking, trimming, and collecting rock or mineral samples during field investigations. It helps geotechnical

engineers examine material properties and structure, supporting accurate site characterization and analysis.

ORDERING INFORMATION

Item	Code
DENSITY PICK	G751X001H
GEOLOGICAL HAMMER	G752X001H

Keywords: geological hammer, G752 geological hammer, ALFA Testing Equipment, rock sample collection, mineral sample collection, field investigation tool, geotechnical analysis tool, engineering field equipment
