

HAND-HELD GPS (G749)

Category: Lab Tools

Product Code: G749

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A hand-held GPS in engineering testing laboratories is used to determine precise geographic locations during field investigations. It helps in mapping sampling points,

tracking site coordinates, and ensuring accurate location data for geotechnical and environmental studies.

ORDERING INFORMATION

Item	Code
HAND-HELD GPS	G749X001B

Keywords: hand-held GPS, G749 GPS device, ALFA Testing Equipment, field investigation GPS, geographic location tool, site mapping device, geotechnical study equipment, environmental study GPS, sampling point locator, engineering field tools
