

LASER TACHOMETER (G765)

Category: Lab Tools

Product Code: G765

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A laser tachometer in engineering testing laboratories is used to measure the rotational speed of equipment or machinery, such as motors or fans, with high accuracy. It uses a

laser beam to detect speed without contact, ensuring precise and non-invasive measurements.

ORDERING INFORMATION

Item	Code
LASER TACHOMETER	G765X001B
HARDNESS TESTER - Portable	G765X002B
COATING THICKNESS GAUGE	G765X003B

Keywords: laser tachometer, G765 laser tachometer, ALFA Testing Equipment, non-contact tachometer, rotational speed measurement, motor speed tester, engineering lab equipment, RPM measurement tool
