

STOPWATCH (G706)

Category: Lab Tools

Product Code: G706

Category: LAB TOOLS

Sub-Category: LAB TOOLS

-
- A stopwatch in engineering testing laboratories is used to measure time intervals accurately during various tests, such as setting time of cement, flow duration, or

penetration tests. It ensures precise timing, which is crucial for reliable and repeatable test results.

ORDERING INFORMATION

Item	Code
STOPWATCH, Digital	G706X001B

Keywords: stopwatch, digital stopwatch, G706 stopwatch, ALFA Testing Equipment, laboratory stopwatch, cement setting time measurement, flow duration timer, penetration test timer, lab timing device, precision stopwatch, engineering lab tools, test interval timer, construction material testing equipment
